DETAILED ACTION

Response to Amendment

This office action is responsive to the amendments and the election of Group I (claims 1-6, 17, 18, 20 and 26).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 5, 17, 18, 20 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Hutchison (US 5,218,189).

Regarding claims 1, 17, 18, 20 and 26: Hutchison discloses all the claimed limitations with respect to encoding the tag by associating the tag with the predetermined resonant frequency and associating the tag with frequencies in the unique position in the n-bit binary code (col. 4, lines 10-23; col. 5, lines 1-25).

Regarding claim 2: Hutchison discloses the resonant circuit responsive to the electromagnetic energy, which is inherently passive (col. 5, line 66-col.6, line 2).

Regarding claim 3: Hutchison discloses the resonant elements (col. 4, lines 13-20).

Regarding claim 5: Hutchison discloses the resonant frequencies (col. 4, lines 13-20).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hutchison (US 5,218,189).

Regarding claim 4: Hutchison does not disclose the active frequency source; however, passive and active frequency sources are well known and used in the art of tag identification.

Regarding claim 6: Hutchison does not disclose the frequencies constitute acoustic signals; however, acoustic signals are well known and used in the art of tag identification as well.

Allowable Subject Matter

Claims 27 and 28 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Vasudevan Pillai et al. (US 6,775,323), Blama et al. (US 6,714,120), and Blama (US 5,444,223) are cited to show a variety of tag coding systems.
